Washington Nursery Company

Toppenish, Washington
(In the Famous Yakima Valley)

Experienced - Organized - Equipped

-To Render You Good Service

You benefit by the experience, organization and equipment of the nursery with which you deal. When you buy nursery stock you purchase a live, perishable commodity, the genuineness and quality of which cannot be fully determined by casual examination. Considerable dependence must be placed in your nurseryman.

EXPERIENCE—The men who grow, pack and ship our goods have spent years in the business. For twenty-seven years we have been engaged exclusively in the nursery business at Toppenish.

ORGANIZATION—From the time young nursery stock is "lined out" in our nursery until it reaches you for planting, a trained, skilled organization is in charge of every stage of growing, digging, packing and shipping. Nothing is left undone and no proper expense spared to produce clean, thrifty, vigorous, well rooted stock.

EQUIPPED—The finest soils of the Yakima Valley are selected for our growing purposes. Not more than one crop of trees is ever produced on the same ground. Our climate conditions are right, the growing season is long, we have moisture under control. Two big insulated packing plants constructed with eight-inch insulated walls and roofs, covering over 30,000 square feet of area, afford the utmost protection during grading, packing and shipping.

GUARANTEE—Stock is guaranteed to arrive in a live, fresh condition for planting; to be true to name; and free from pest or plant disease. It is obvious that we cannot guarantee that customers will make trees live, as we have no control over conditions surrounding them and the care they will receive after leaving our hands. If by any chance any stock is not received in good condition please advise us at once.

HALF PRICE REPLACE

Stock failing to grow after receiving reasonable care will be replaced at half the regular retail price providing the Nursery is notified by August first following date of delivery.

PLANTING SYSTEMS AND DISTANCES

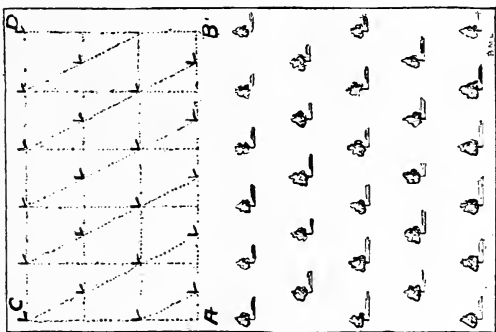

The **SQUARE SYSTEM** is most commonly used. Its advantages are that it is easy to lay out and allows plenty of room for cultivation, spraying, hauling, etc., in two directions.

The **TRIANGLE SYSTEM** allows one to put about 15% more trees per acre without crowding any more than the square system, and for this reason is preferred by many.

A little study of the illustrations will easily indicate how to lay out the planting.

THE SQUARE SYSTEM

THE TRIANGLE SYSTEM

NUMBER OF SHRUBS OR PLANTS FOR AN ACRE		SUITABLE DISTANCE FOR PLANTING	NO. FT. EACH WAY

CHERRY POLLINATION. Bing, Lambert and Royal Ann need a pollinizer. Use Black Republican, Black Tartarian or Waterhouse for Bing and Lambert and Waterhouse for Royal Ann. Use Early Richmond as pollinizer for Montmorency. Use about one to eight.

MAZZARD ROOT. Experiment Station officials recommend Mazzard roots for sour cherries because they are longer lived and produce larger trees. Our cherries, both sweet and sour, are on Mazzard.

PLUMS

PLANT THE YAKIMA PLUM FOR ROADSIDE MARKETING

The selling of fruit from stands along roadside is a new and rapidly developing phase of American life. Maximum prices are received for fresh farm products marketed in this manner. Many farmers are taking advantage of this situation and planting varieties particularly adapted to this purpose.

SHADE AND ORNAMENTAL TREES

CUTLEAF WEEPING BIRCH—Probably the most popular and desirable lawn tree in existence. Vigorous and perfectly hardy. Trunk straight, slender, and white as snow. Slim side branches droop in a most picturesque manner. Foliage delicate and deeply cut, coloring finely in the fall. The drooping branches and silvery bark form a most effective combination during the winter months, while the effect in summer, with the long, gracefully drooping branches clothed with dainty leaves, is equally pleasing.

All stock offered has been transplanted, is first-class with good straight stems. Prices on larger quantities quoted on application.

All trees 6 to 8 ft. high and $\frac{3}{4}$ to 1 inch caliper unless otherwise specified.

Twelve of a kind sell for the price of ten.

BIRCH—	Each

WINDBREAKS

(1 year whips)

Windbreaks are a necessity in many sections between the Cascades and Rocky Mountains. They protect the home, orchard, garden and barnyard, both in winter and summer and add greatly to the value of any property. At the prices quoted here you can plant a good windbreak at very little cost.

Box Elder, Carolina Poplar, Lombardy Poplar and Canadian Poplar. (Not less than 25 of a variety sold).

	Per 25	Per 50	Per 100	Per 500	Per M
3-4 ft.....	\$5.00	\$8.00	\$15.00	\$65.00	\$125.00
4-6 ft.....	6.00	9.00	17.50	80.00	150.00

CHINESE or SIBERIAN ELM. Hardy, rapid growing, dry land elm, branches heavily from ground up. Not less than 25 sold.

	Per 25	Per 50	Per 100	Per 500	Per M
2-3 ft.....	\$4.00	\$7.00	\$12.50	\$55.00	\$100.00
3-4 ft.....	5.00	8.00	15.00	65.00	125.00

Catalpa Bungei (Umbrella Tree). A fine tree for formal planting.

EVERGREENS

The use of Evergreens is increasing but a word of caution should be said about them. One should be careful to plant around foundations and under windows only the dwarf types, Juniper, canadensis, Juniper Pfitzeriana, Juniper Savin and Mugho Pine. For planting at the corner of the house to give accent to the planting or in the side yard use the Arbor Vitae, Berckman Golden and Pyramidal; Juniper Irish and Virginian. For large yards where plenty of space is available or for wind-break or screen purposes use Arbor Vitae, American and Oriental; Fir, Concolor and Douglas; Spruce Colorado Blue, Colorado Green and Norway.

TIME OF DELIVERY—East of Cascades, **SPRING DELIVERY ONLY.** West of Cascades, fall or spring delivery.

HARDINESS. All varieties listed are hardy east of the Cascades.

PROTECT FROM DOGS. Evergreens should be surrounded with a wire screen at least 2 ft. high to protect from dogs.

EVERGREEN ORDERS MUST BE ACCOMPANIED BY DEPOSIT.

ALL EVERGREENS ARE SOLD F. O. B. TOPPENISH.

Write orders for evergreens on a separate order blank. Customers should be instructed to give extra care to evergreen stocks in the way of liberal moisture, etc.

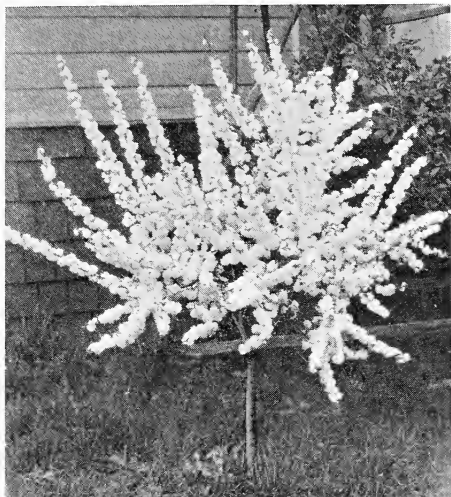

All evergreens carefully bailed and burlapped.

ARBORVITAE (Thuya)	Each
Berckmans Golden, 12-13 in.	\$2.50

The Norway Spruce is the best to plant for a living Christmas tree.

ORNAMENTAL SHRUBS

Flowering Almond

(Height given is the ultimate height the shrub attains
and NOT the height delivered)

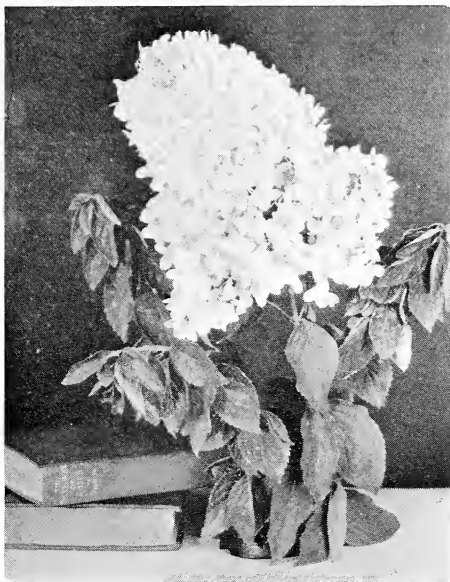

(See Pages 14 and 15 for help in making selection)

	Each
ALMOND —Double pink. Beautiful, small shrub. Bears in May, small rose-white flowers, 4 to 5 ft.	\$1.00
ALMOND —Double White. Same as above except white flowers.	1.00
BARBERRY —JAPANESE (THUNBERGI). Immune from wheat rust; beautiful, small, compact; somewhat thorny; bright red leaves in autumn; red berries all winter; fine for hedge, 3 feet.60
BARBERRY —REDLEAF. Same as above except foliage red all summer. Should be planted in the sun.	1.00
BUTTERFLY BUSH —Rapid, spreading growth. Flowers are lilac marked with yellow, borne in spikes nearly a foot long, extremely fragrant; blooms August-September; 15 ft.85
CORALBERRY —Small graceful shrub attaining height of 2 to 4 ft. Leaves bright green and tinged with reddish purple when young. Covered with red berries all summer.50
COTONEASTER —Peking (Acutifolia). A dense growing shrub with small, oval glossy dark-green leaves, 7 ft.75
DEUTZIA LEMOINE —Dwarf growing; white flowers; blooms in June; very hardy. 3 to 4 ft.85
DEUTZIA —PRIDE OF ROCHESTER. Said to excel others in size of double white flowers; vigorous; 5 to 6 ft.85
DEUTZIA —ROSE PANICLE. Flowers double white tinged rose outside. 6 ft.85
DEUTZIA —SLENDER (GRACILIS). Similar to Lemoine but not so large a grower. 2 to 3 ft.85
DOGWOOD —CORAL (Redtwig). Branches bright red particularly conspicuous in winter; growth erect. Flowers creamy; berries light blue. 8 to 10 ft.75
DOGWOOD —GOLDENTWIG. Bush-like habit. Bright yellow branches. 8 ft.75
ELDER —GOLDEN LEAVED. The finest golden coloring of all the hardy shrubs, entire foliage remaining bright, beautiful golden color throughout the summer. Ultimate height 8 to 10 ft.85
FORSYTHIA —BORDER (INTERMEDIA). Slender arching branches. Golden yellow, very showy flowers. 8 ft.85
FORSYTHIA —WEeping (SUSPENSa). Drooping, pendulous yellow flowers. Blooms in early spring, 6 to 7 ft.85
HONEYSUCKLE —MORROW (Japanese Bush Honeysuckle). Flowers pure white changing to yellow. Berries red or yellow and showy. 8 ft.85
HONEYSUCKLE —RED TATARIAN. Pink flowers which contrast most beautifully with the foliage. Red fruit also ornamental. 10 ft.85
HONEYSUCKLE —WINTER (FRAGRANTISSIMA). Fine new variety. Spreading branches, bright green leaves persisting to midwinter. Flowers creamy white or light yellow. 6 to 8 ft.	1.00

Washington Nursery Company

HOLLYGRAPE (OREGON GRAPE) —An ornamental ever-green shrub, with dark, lustrous green, spiny-toothed leaves and yellow flowers in dense clusters, followed by blue or nearly black berries. SELL IN WASHINGTON ONLY. 3 ft.	2.00
HYDRANGEA—PEEGEE (PANICULATA GRANDOFLORA). White flowers in panicles 1 foot long. July-October. 3½ ft.	1.00
HYDRANGEA—SNOWHILL (ARBORESCENS). Blooms from June till autumn frosts; 4 to 5 feet breadth and height... 1.25	
KERRIA—DOUBLE, Flowers clear yellow, similar to a small double rose. Branches long, slender, erect, with bright green bark. 2½ ft.	1.00
LILAC—Common Violet Free bloomer, very fragrant, 8 ft.75
LILAC—COMMON WHITE, Same only white bloom. 8 ft.75
LILAC—MICHAEL BUCKNER. Dwarf plant; very double, light blue.	1.25
LILAC—MADAM LUDWIG SPAETH. Single, large long panicles, flowers purplish-red; finest of its color.	1.25
LILAC—PERSIAN. Medium size, small leaves, bright purple flowers.	1.00
LILAC—PRESIDENT GREVY. A beautiful blue; individual flowers very double and very large. The panicle is magnificent and measures 11 inches in length and 5 inches across.	1.25
MOCKORANGE—SWEET (PHILADELPHUS CORONARIUS). White, sweet scented flowers; bloom in June. 10 ft.85
MOCKORANGE—GOLDEN. Medium size; golden yellow foliage; very pretty. 3 to 4 ft.	1.25
MOCKORANGE—LEMOINE. Upright growth; small yellowish white, fragrant flowers, completely covering bush. May and June. 4 to 5 ft.85
MOCKORANGE—VIRGINAL. Vigorous and tall; flowers in dense clusters, large and double; pure white, 6 ft.	1.00
PRUNUS CISTENA (Purple Leaf Sand Cherry.) Cross between Purple Leaf Plum from Persia with the South Dakota Sand Cherry. Rich red foliage in early spring, later turning to purplish green during summer. Valuable for its color contrast. Small white bloom in early May. 5 ft.	1.00
QUINCE—FLOWERING (CYDONIA JAPONICA). Large brilliant blossoms, blooms early spring. Growth straggling but can be pruned to desired shape. 6 to 8 ft.	1.00
SNOWBALL—COMMON. Large size, pure white flowers, blooms in May. 8 ft.	1.00
SNOWBERRY—COMMON. A popular hardy shrub of medium size and bush form; leaves oval and smooth; small pink flowers in summer followed by large, waxy white berries in autumn; persisting into midwinter. 6 ft.50
SPIREA—ANTHONY WATERER. Dwarf grower, 24 in.; fine for edging; flowers magenta red, turning pink, blooms from June to October. 2½ ft.75
SPIREA—BRIDAL WREATH (PRUNIFOLIA). Very beautiful flowers like small white daisies. Early spring. 3 ft.85
SPIREA—FROEBEL. Crimson flowers in flat panicles. Medium to dwarf in size. Excellent for shrub groups. 3 ft.85
SPIREA—GARLAND (ARGUTA). Free bloomer and showy shrub. Flowers small and pure white in early spring. 4 to 5 ft.85
SPIREA—THUNBERG. Small white flowers; blooms early spring; rounded, dwarf bush; branches somewhat drooping. 4 to 5 ft.85
SPIREA—VAN HOUTTE. One of the best shrubs; does well any location; very ornamental; dense clusters white flowers; fine single or in group or hedge; blooms early May. 5 to 6 ft.85
SYRINGA.—GARLAND. (Same as Sweet Mockorange).	
TAMARIX HISPIDA. A very beautiful shrub or small tree; feathery green foliage; pink bloom, solid mass of color in June. Erect and shapely growth. Fine in sandy soil. Ultimate height 12 to 15 ft.	1.00
WEIGELA—EVA RATHKE. Carmine blooms in great profusion in June. 3 to 4 ft.	1.25
WEIGELA PINK (ROSEA). Elegant shrub; rose colored leaves; hardy. 5 to 6 ft.	1.25
WEIGELA—VARIEGATED. Leaves bordered yellowish white, pink flowers, June. 3 to 4 ft.	1.25

Hydrangea Paniculata Bloom.

HEDGE PLANTS

BARBERRY—JAPANESE (THUNGERGI). For untrimmed hedge.

	25	50	100	500	1000
8 to 10 inches.....	\$5.00	\$8.00	\$15.00	\$68.00	\$125.00

PRIVET—EUROPEAN—Fine for trimming if stiff, formal hedge is desired.

PRIVET—Lodense—Dwarf type of European Privet. Very fine. Can be supplied in 12-18 inch size only.

	25	50	100	500	1000
12 to 18 inches----	\$5.00	\$8.00	\$15.00	\$68.00	\$125.00
18 to 24 inches----	6.00	9.50	18.00	82.50	150.00

NOTE—In planting hedges, the Privet should be planted 6 inches apart if set in a single straight row, or 12 inches apart if set in a double row and plants set "staggered" in the rows. Barberry can be set 12 to 18 inches apart for hedge purposes.

IRIS

"S" refers to the three standard or upright curling petals; "F" to falls or drooping petals.

	Each	Dozen
ALCAZAR. Large bicolor. S. Light violet-bronze; F. Deep reddish-purple. 3½ ft.	\$.35	\$ 3.50
ISOLINE. A grand and distinct Iris. S. pinkish buff; F. Chinese violet, tinted yellow. 3 ft.	.35	3.50
KOCHI. Very early flowering Iris, of deep, black- ish purple. Very popular. 24 inches	.35	3.50
LOHENGRIN. S. light mauve; F. Chinese violet, both somewhat ruffled. 3 ft.	.35	3.50
LORELEY. Very profuse bloomer. S. yellow, splashed purple; F. purple, bordered yellow	.35	3.50
MAY QUEEN. Delightfully fragrant, and the best of the old "pinks." 30 inches	.35	3.50
SANS SOUCI. Blooms medium size, standards clear, golden-yellow; falls veined with maroon. Usually single bloom borne on sturdy straight stem. Very brilliant and showy		
SIBERIAN. One of the most beautiful and grace- ful of Iris. Flowers borne on strong erect stems, dark purple	.35	3.50

ROSES

CHOICE FIELD GROWN—NOT HOT-HOUSE GROWN

Do not confuse our choice stock with the small, tender, hot-house plants offered by mail order houses at cut prices—such plants always prove a disappointment, for if they do live one must wait two years before they bloom.

ABBREVIATIONS USED TO DESIGNATE THE VARIOUS CLASSES OF ROSES

H. P., HYBRID PERPETUAL—

Hardy, vigorous and easily grown. Though called perpetual, they are not such free bloomers as the Hybrid Teas and Teas, but bloom only at intervals during the summer and fall. Recommended for planting in any section east of the Cascades and in the higher elevations wherever roses can grow.

H. T., HYBRID TEA—

A cross between the hardy Hybrid Perpetuals and the deliciously scented Tea Roses. Not so hardy as the Hybrid Perpetuals, but freer bloomers and more fragrant. This is the so-called "monthly blooming" class. Not recommended for planting where winter temperature gets below 15 degrees below zero unless one is prepared to give extra winter protection.

T. TEA—

These are the favorites where they can be successfully grown on account of their everblooming qualities, fragrance, delicate colors, and fine forms. Good for growing indoors in winter. Not hardy and recommended only for the milder sections west of the Cascades.

POLY. POLYANTHA—

Delightful for massing in beds, or as edges for borders or beds of taller growing roses. Their small, neat flowers are produced in large clusters, entirely covering the plant, through the summer and fall. They are useful for indoor as well as outdoor growing. Will grow wherever the Hybrid Perpetuals will grow.

WICH. WICHURAIANA ROSES AND THEIR HYBRIDS—

An almost evergreen type that creeps along the ground and covered, when in bloom, with immense bunches of single roses. Some of them, such as Dorothy Perkins, are double, are good climbers and very beautiful. Excellently hardy.

PER. PERNETIANA—

A new race originated by Pernet-Ducher, famous rosarians of France, and which is becoming very popular, being absolutely hardy and free blooming.

RUGOSA ROSES

ROSA RUGOSA—Hardy. Plant is ornamental and it flowers abundantly in June and from then till fall.....	.75	7.50
PRAIRIE ROSE (Rosa Setigera)—The plants are vigorous growers, 6 ft. or more high with long gracefully recurving branches completely covered with flowers.....	.75	7.50

HOW TO PLANT ROSES

Dig the hole eighteen inches deep; cut off broken or injured roots; hold the plant in position and spread out the roots so they do not cross or crowd one another at any point, fill in the holes carefully with the fertile top soil, pressing it firmly in about the roots. A small handful of finely ground bone meal sprinkled in is very helpful. Water should be used to wash the soil well in around the roots. After the hole has been filled and pressed in firmly and packed well, cut back the tops one-half to two-thirds, then mound loose dirt up about them for six to ten inches. This mound of dirt should be placed about the canes whether the roses are planted in the fall or spring, otherwise they are apt to dry out.

If the roses are planted in the fall, this mound should be covered with a thick mulch of straw and leaves. As soon as the buds start to grow, rake away the mound and cut back the canes leaving two to four buds to each cane. Make this cut just above a sound outside bud, so the new canes will grow outward and make a shapely bush.

When planting budded roses, the point where the bud was inserted in the stock (as shown by "A") should be set several inches below the surface of the ground.

Watch out for sucker growth which might spring up from the wild rose roots, cut it off as soon as it appears. You can easily distinguish it from the top growth as it is more thorny and has seven leaves on each leaf stem while most domestic roses have five leaves.

The planting of shrubs and trees about the home should have a meaning. Everything should be so arranged as to make the home the center of the picture.

FUNDAMENTAL PRINCIPLES OF ARRANGEMENT

First: "Tie" the house to the ground with a planting of shrubs around the foundation which will break the sharp angle caused by the house meeting the ground and make it "melt" or nestle into its surroundings. For this purpose you will, of course, want the low growing shrubs, unless your house rests on a very high foundation. In corners where there are no windows you can plant some of the higher shrubs, massing the lower ones in front. As a general rule the prevailing height of the shrubs around the rest of the house should be no higher than the bottom windows. In order, however, to avoid monotony plant slightly higher shrubs between the windows.

Plant masses of shrubbery around the lawn or outer border of your place to give it a distinct outline. Use the larger ones for the background, working down to the smaller ones directly in front.

TO HELP YOU SELECT WHAT SHRUBS YOU WILL NEED for the different purposes mentioned, the following table showing color, period of bloom and approximate height has been arranged; with this you can easily select just what shrubs are best suited for the purposes intended.

Toppenish, Washington

Blooming period given applies to Yakima Valley. Same relative periods will apply elsewhere.

	Color of Bloom	Period of Bloom	App'mate Height
Almond, Pink	Pink	April	4 to 5 ft.
Almond, White	White	April	4 to 5 ft.
Barberry, Japanese			3 to 4 ft.
Barberry, Redleaf			3 to 4 ft.
Butterfly Bush	Light purple	Jul.-Sep.	12 to 15 ft.
Calycanthus Floridus	Brown	Apr.-May	4 to 5 ft.
Coralberry			3 to 4 ft.
Cotoneaster Acutifolia			4 to 5 ft.
Cranberrybush	White	May-June	8 ft.
Deutzia, Lemoine	White	June	3 to 4 ft.
Deutzia, Pride of Rochester	White	May-June	5 to 6 ft.
Deutzia Rosea	Light pink	June	6 ft.
Deutzia Slender	White	June	2 to 3 ft.
Dogwood Coral	Creamy white	Apr.-May	8 to 10 ft.
Dogwood, Goldentwig			8 to 10 ft.
Euonymus Winged			6 to 8 ft.
Elder, Golden leaved			8 to 10 ft.
Forsythia Border	Yellow	Mar.-Apr.	8 ft.
Forsythia, Weeping	Yellow	Mar.-Apr.	6 to 8 ft.
Honeysuckle	White-lt. cream	Apr.-May	8 ft.
Honeysuckle, Red Tatarian	Pink	Apr.-May	10 ft.
Honeysuckle, Winter	White	Apr.-May	6 to 8 ft.
Hollygrape			3 to 4 ft.
Hydrangea Peegee	White-bronze	Jul.-Oct.	5 to 6 ft.
Hydrangea Snowhill	White	Jun.-Oct.	4 to 5 ft.
Kerria Double	Yellow	May	2½ ft.
Lilac, Belle de Nancy	Rose pink	May	8 to 10 ft.
Lilac, Common Violet	Purple	May	8 to 10 ft.
Lilac, Common White	White	May	8 to 10 ft.
Lilac, Michael Buckner	Light blue	May	3 to 4 ft.
Lilac, Mad. Ludwig Spaeth	Purplish red	May	6 to 8 ft.
Lilac, Persian	Light purple	May	8 to 10 ft.
Lilac, Pres. Grevy	Blue	May	8 to 10 ft.
Mockorange, Sweet	White	June	19 ft.
Mockorange, Golden	White		3 to 4 ft.
Mockorange, Lemoine	White	June	4 to 5 ft.
Mockorange, Virginal	White	Jun. & Oct.	6 ft.
Quince, Flowering	Red or Pink	April	6 to 8 ft.
Snowball, Common	White	May-Jun.	6 to 8 ft.
Snowball, Japanese	White	May-Jun.	6 to 8 ft.
Snowberry, Common	Pink	June	6 ft.
Spirea, Anthony Waterer	Red	July-Oct.	2 ft.
Spirea, Bridal Wreath	White	April	3 ft.
Spirea, Billardi	Pink	Jun.-July	5 ft.
Spirea, Froebel	Red	July-Oct.	3 ft.
Spirea, Garland	White	May	4 to 5 ft.
Spirea, Golden			2 to 3 ft.
Spirea, Thunbergi	White	March	4 to 5 ft.
Spirea, Van Houtte	White	May	5 to 6 ft.
Tamarix Hispida	Pink	Jul.-Oct.	12 to 15 ft.
Weigela, Eva Rathke	Red	May	3 to 4 ft.
Weigela, Rosea	Pink	May	5 to 6 ft.
Weigela, Variegated	Pink	May	3 to 4 ft.

WATER PLENTIFULLY ALL NEWLY PLANTED STOCK

Very few realize the importance of watering heavily when planting, whether fall or spring. The ground should be thoroughly SOAKED around the roots at planting time, so roots will become firmly imbedded in wet soil.

When planting in the spring, Never Let the Ground Get Dry for at least ten weeks after planting. It is not possible to water too much during that period.

Washington Nursery Company

SIBERIAN or CHINESE ELM (*ulmus pumila*), Pasco, Wash., 6 years after planting a 5 ft. whip. 34 inches circumference at 18 inches from ground

U. S. DEPARTMENT OF AGRICULTURE RECOMMENDS IT

This remarkable, fast growing, hardy, dry land Elm, was introduced by the U. S. Department of Agriculture and is highly recommended by them. They say of it:

"It is very hardy and has proved valuable under a greater variety of climatic and soil conditions than any tree yet introduced. Its resistance to drought, alkali and extremes of temperature render it an especially valuable tree."

Our stock comes from the original trees brought to this country in 1908, from near Peking and Southern Manchuria. It is the true, hardy North China strain and should not be confused with stock grown from seed secured in the almost torrid zone of Southern China.

IF YOU WANT SHADE QUICKLY PLANT THE SIBERIAN ELM

Nothing adds so much to the comfort and value of a home as cooling shade. Even the most modest home can afford the cost of a few shade trees, each one of which costs about as much as a good phonograph record, radio tube, or the price of a show for the whole family. The value of these things is greatest at the time of purchase. A good shade tree however, especially the Siberian Elm, grows in beauty and value, giving untold comfort and adding greatly to the sale value of any property.

Plant the Siberian Elm NOW. This is a tree that you, yourself, can enjoy. You will not be planting for your children's children alone when you plant it.

This tree has the qualities you want, the speed of the Poplar, the grace and beauty of the Birch, and the height, majesty and durability of the American Elm.

**WE HAVE PLEASED OTHERS—WE CAN PLEASE
YOU**

MONTAGUE, CALIFORNIA Feb. 7, 1930.

"About 4 years ago I bought some Siberian Elms from you. They have done so well that I would like more."

EDMONDS, WASHINGTON March 18, 1930

"I am very much pleased with the trees I got (100 Montmorency) on last order and if you have got them I would like to get about 50 more of the same grade."

MISSOULA, MONTANA March 17, 1930

"Several years ago we planted your McIntosh trees and they are such sturdy stock we would like to secure some more for this spring's planting."

SPOKANE, WASHINGTON March 22, 1930

"Two years ago I received some stock from you and am well pleased with what you sent me. Many people ask me where I got such nice stock."

OSTRANDER, WASHINGTON April 11, 1930

"Please send your catalog and price list to G. L., 2910 Rodgers St., Bremerton, Wash., and oblige an old time customer. Every tree we have purchased from you has lived and thrived and we wish others to share in the good products you put out."

SANBERG, CALIFORNIA April 27, 1930

"The trees of enclosed bill arrived yesterday. They were surely packed fine and arrived in splendid condition and I congratulate you on having such competent and worthy help. I never received better trees or better packed trees."

SEATTLE, WASHINGTON May 14, 1930

"You will be interested to know that I just received a letter from my friend in Holland stating that the Anjou pear trees which were supplied by you, reached Rotterdam in good condition about the first of May and were immediately planted.?? (Sent Feb. 28, 1930).

PORT ELIZABETH, SOUTH AFRICA

April 29, 1930

"We are pleased to advise that the Ulmus Pumila (200 3-4 seedlings shipped January 21, 1930, consigned to L. Richardson & Co., Algoa Bay, South Africa) trees consigned by your good selves have at last been delivered to us after a lot of trouble with the Government Authorities.

"A few of the trees have unfortunately died, but we have sent certain lots out to our various farms and from reports received these appear to be getting on very nicely indeed. We shall advise you at a later date as to their progress."

NEPHI, UTAH June 22, 1930

"Some of the best nursery stock that has come into this valley came from the Washington Nursery Co., and your splendid treatment to customers has gained a host of friends."

NEWBERG, OREGON June 28, 1930

"That order from Mrs. Garlick of Portland makes, according to her own story to me, about 15 years dealing with W. N. Co. and always has had good results with W. N. Co. stock."

RAISE FRUITS and BERRIES IN YOUR OWN GARDEN

You will reduce your cost of living, have fresher and better products, add to life's enjoyment; enhance your property values, feel better, look better, sleep better, be better.

We recommend highly the following list of choice varieties:

APPLES

Red Gravenstein. The solid red Gravenstein unequalled as an early fall eating and cooking apple.

Richared Delicious. The long keeping, solid Red Delicious; the dessert apple supreme.

PEARS

Bartlett. The standard summer eating and canning pear.

Bosc. The high class winter dessert pear.

CHERRIES

Bing. The large black, rich eating cherry.

Montmorency. The best canning sour cherry.

PLUMS

Yakima Plum. The very large, mahogany red, luscious plum introduced by us several years ago. One of the largest, most beautiful and best plums grown.

PEACHES

J. H. Hale. Very large, beautiful yellow with red cheek; quality unexcelled.

APRICOT

Sophia. Very early heavy bearer and hardy. The original tree near Toppenish withstood 30 below zero last winter and bore 1300 pounds of fruit.

Tilton. Fine for canning.

GRAPES—A grape arbor should be in every back yard.

Agawam. Deep red, large. Excellent quality.

Concord. The standard blue grape.

Island Belle. Early large, black, very good.

Moores Diamond. Large white.

Csaba. New earliest of all table grapes, about week before Moore's Early.

Thompson Seedless. Small, sweet, very good.

RASPBERRIES

Latham. Large, luscious, very hardy, nearly everbearing. Quality excellent.

WASHINGTON NURSERY CO.
